

Test reliable file sharing online for free

Do you want to deliver a document or request one from your partner online
- without using email?

There is an opportunity through the **Edico Lite** service.

In brief

You call your partners and ask them to choose access to the web folder you opened via links from a reliable website. You enter the folder number and password. With this information, you have an online folder where you can share confidential documents for 48 hours without using e-mail traffic.

Opening up an opportunity

You get this opportunity without permanently committing to any paid service. You just need to accept the following procedure to open **Edico Lite** free service. You can access it using the path www.edico.fi/en/ -> **Services** -> **Pricing** -> Edico Lite - **Try for free**. You can access the service directly with your Facebook credentials.

You can also open the **Edico Lite** service by entering the credentials required for logging in, in which case you will receive a link to the service and a numbered session opening page via email (!).

Then do it

Call your partner and ask him to select "**Lite**" via the "**Participate when invited**" link on the <https://www.edico.fi/fi/> website and to enter the number of the folder you opened and the chosen password. With this information, you have an online folder where you can share confidential documents for 48 hours with a partner.
